

## Important Recall Information

In May 2013, the DOT issued a recall on composite cylinders manufactured by The Lite Cylinder Company.

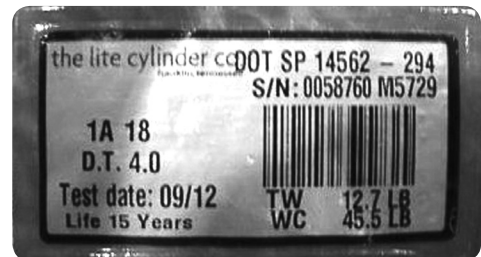

**Emergency Order No. 2013-002**  
**Docket # PHMSA-2013-0123**

Only composite cylinders from The Lite Cylinder Company are affected by this recall. These products can be identified by the manufacturer ID and special permit numbers held by The Lite Cylinder Company and found on labels affixed to the top of the cylinders or on the sides near the valve outlets. This label is permanently bonded to the cylinder and cannot be removed without obvious damage to the cylinder.

**Recalled Manufacturer ID: M5729**

**Recalled Special Permits: DOT-SP 14562,**  
**DOT-SP 13957, and DOT-SP 13105**

A cylinder that has any one of these markings has been recalled and should be removed from service.

*Composite cylinders manufactured by other companies and under other special permits are not recalled under this order and may continue to be refilled, recertified, and used.*
